

Moohammad Samaae

Software developer with 5+ years building and deploying serious web applications using modern frameworks. I'm obsessed with solid code and delivering maintainable high-quality solutions. Looking for a new full-stack role where I can balance great front-end UX with architecting solid, scalable back-end systems.

Professional Experience

Full-stack Developer, Klimato

September 2023 — Present

- **AI-Driven Development:** Migrated the entire codebase to **TypeScript**. This shift standardized code quality and type safety, enabling the integration of **AI-assisted automation** (e.g., Cursor) to handle non-critical bug fixes, **significantly accelerating our deployment and feature delivery speed**.
- **Code Quality & Standards:** Participated in daily peer code reviews for all feature branches and hotfixes, ensuring adherence to modern coding standards and contributing to the maintenance of a high-quality, stable codebase.
- **Monorepo Consolidation:** Contributed to the team effort into a unified **monorepo** of existing microservices. This initiative improved cross-service code reuse, reduced dependency conflicts by **40%**, and better supported advanced tooling.

Frontend Developer, Devoteam Creative Tech

November 2022 — May 2023

- **Critical Performance Fix:** Engineered and deployed an **optimized rendering solution** for large-scale data tables (10,000+ rows). This fix cut page load times from **15-30 seconds down to 2-3 seconds**, solving a critical user experience bottleneck.
- **DX & Modernization:** Executed the transition to **Vite** and **Pinia**, significantly modernizing the build process and improving daily developer efficiency (DX).
- **Framework Modernization:** Delivered a full codebase migration from **Vue 2 to Vue 3**, integrating the Composition API to future-proof the application and improve long-term maintainability.

Full-stack Developer, Bonnier Healthcare

June 2020 — November 2022

- **Full-Stack Deliverable:** Got promoted from Intern to Full-stack Developer after delivering the **Pharma Monitor Express** dashboard, which became a core sales tool and helped **catalyze a 15% increase in high-value B2B customer acquisition**.
- **Data Pipeline Build:** Built the full-stack data pipeline (ingestion, processing, display) for complex, sensitive regulatory data, ensuring compliance for client-facing analysis tools.
- **Reactive UI:** Architected the core client dashboard with a complex, highly reactive filtering system that drastically improved specialized sales analysis speed.

Skills

Languages

JavaScript, TypeScript, C#, PHP, HTML5, CSS

Libraries & Frameworks

Vue.js, React.js, Node.js, NestJS, Laravel, Vuetify, Quasar, jQuery

Tools & Platforms

Git, GitHub, GitLab, Webpack, Vite, Netlify, Heroku, Postman, Unit Testing (Playwright/Vitest), Integration Testing

Education

Nackademin

2019-2021

Full-stack Web Developer
Open Source
